

EXHIBITION: JAPAN DRONE 2020

We exhibit our airbag for a drone on 29 and 30 Sep, 2020 on Japan drone 2020 in Makuhari Messe.

We will display a CG movie of our airbag for delivery drone in this time.

Our air bag is not only to absorb the damage on falling but also to float on falling to water, so the drone keep the cargo if it is fallen to river, lake and sea.

In normal time

When the airbag is deployed.
